**September 2010 –June 2013**

**18. NERVOUS SYSTEM – brain, nervous disorders, dementia, senility, Alzheimer’s**

---

**18.a. Paralysis of Throat**

A 54 year-old man suffered from a paralytic stroke resulting in loss of speech and a paralysed throat. Although he was not diabetic the doctors thought that this could be a case of ‘silent hypertension’. The patient had to be fed through a pipe directly to his stomach. The man’s son met with a Vibro practitioner who gave him the following combos for his father:

**CC18.1 Brain & Memory Tonic + CC18.4 Stroke + CC19.7 Throat ...QDS**

The boy administered the pills to his father orally and within just 3 days the patient was able to swallow and even speak! The patient still suffers from some memory loss but continues to take the Vibro Combos and is undergoing physiotherapy to aid his complete recovery.
