“Whenever you see a sick person, a dispirited, disconsolate or diseased person,
there is your field of seva.”...Sri Sathya Sai Baba

Vol 2 Issue 2.5

April 3, 2011

☞ From the Desk of Dr. Jit K. Aggarwal ☜

Dear Practitioners

This special edition of *Sai Vibrionics Newsletter* is devoted to disaster protection from radiation and earthquake plus safeguards for your food.

Our hearts and prayers go out to all our brothers and sisters in Japan in their time of suffering. We were happy to learn that the combos we recommended to the Japanese practitioners to make for their people have proved useful. Now we wish to make contact with all practitioners worldwide in order to make suggestions for their well-being, and for the people that they are in contact with during these challenging times.

This is not a time to panic but to take precautionary measures. The fallout radiation from the broken nuclear reactors in Japan and carried through the world's air currents to all countries, while diluted, will still be poisonous to our bodily systems. One of the ways we can protect ourselves is through our vibro healing system. Below are two combos you can make and give to patients, family, friends, animals and others.

On a happier note, we are delighted that Bhagwan Sri Sathya Sai Baba, our beloved Swami, is well on the way to complete recovery. We do expect Swami to return to Yajur Mandir soon and take rest for some time. Implanting a permanent cardiac pacemaker was necessary for Swami's physical body while the Divine Pace-setter unrelentingly continues to maintain the rhythm of the Universe.

Although Swami will not have 'missed a beat' many of us may continue to suffer from 'missed-beats' and anxiety over His wellbeing or about the world situation. Both are due to insufficient faith or a lack of full surrender. “*Bend your Body; Mend your Senses; End your Mind*” says Baba. Each one of us is a full expression of Brahman (God). Let our minds not trouble us any longer as we work to shed our ego and purify our senses by dedicating every thought, word and deed to Bhagwan Sri Sathya Sai Baba, the Lord of the Universe. We live in maya (illusion) with societal conditioning shaping our thoughts and our limited or worldly experiences that keep us from seeing ourselves beyond our individual ego self. Setting aside some minutes each day to study Sai's teachings, repeating the Lord's name and singing or humming devotional songs throughout the day can help us find God within.

The only way I know to pray is not to pray for any 'thing' in particular. Bhagwan Baba is the Supreme God Almighty, incarnated in human form. He is enacting another leela to wake us up, to cajole us on the uphill path to be in tune with Him. I pray to Bhagwan that I do my utmost to get my thoughts, words and deeds right and together; to become a selfless and loving instrument of His and to free myself of any selfish or ego traits. I pray for true surrender and to become worthy of being called His devotee. I cannot ask for more when I am fully aware that He alone is the Doer, the wirepuller of the entire cosmic drama and I am merely a willing puppet in His divine hands. I pray my heart's offerings and my actions will please Him and contribute toward speeding up His recovery. What do you pray for?

In loving service to Sai

Jit Aggarwal

Remedy for Radiation Exposure

Combo to make with Vibro Sai Ram Machine:

NM12 Combination 12 + NM45 Atomic Radiation 30C & 50M + NM63 Back-up + NM110 Essiac CM + 10MM + BR4 Fear + SM2 Divine Protection + SM4 Stabilising + SM5 Peace & Love Alignment + SM18 Digestion + SM23 Gastro + SM226 Cat's Eye + SR253 Calc Fluor + SR272 Arsen Alb 30C + SR279 Cadmium Sulph + SR265 China Off (200C) + SR310 Radium +SR319 Thyroid Gland 200C + SR320 Thyroidinum 200C + SR324 X-ray 30C & CM + SR256 Plumbum Met 1M + SR507 Lymphatic Organ + SR509 Marrow + SR530 StomachOD for at least two months

108 Common Combos:

CC2.1 + CC3.1 + CC4.10 + CC6.1..... OD for at least two months

With both the Machine and the 108 CCs: If people start to experience symptoms like fatigue, weakness, nausea and vomiting, then increase the dosage to TDS.

☪ Health Tips ☪

Here are other radiation precautions you might consider following:

1. Avoid toothpaste that has fluoride as it hurts anyone exposed to radiation because it pulls iodine out of the body which leaves one's thyroid exposed.
2. Do not take the tablet KI unless you know you have been exposed to radiation because it will damage a healthy thyroid.
3. Although alternative health-focused people usually recommend using crystal or sea salt because of their added mineral content, now is the time to take the salt sold in supermarkets as it usually contains 0.01% potassium iodate, which helps protect us from radiation. But before buying check that this salt has potassium iodate in it and not potassium iodide. In Europe and America you will be able to get in health and alternative organic stores Liquid Black Walnut, Black Walnut Capsules and Kelp, all have a large amount of good iodine in them.
4. Algin, which is Sodium Alginate from Brown Seaweed, pulls radiation out of the body.
5. Miso broth is the classic food for prevention of radiation damage. There is twice the protection if a quarter-ounce/5 grams of dried kelp seaweed is added to the soup. But note in the future one should check where the dried kelp has come from. In scientific studies, seaweed was able to neutralize radioactive isotopes in the human body. Researchers at McGill University say radioactive strontium binds to the algin in brown seaweeds to create sodium alginate, a compound easily and harmlessly excreted. Common black tea exhibited the same anti-radiation effects in several Japanese studies.
6. High doses of Vitamin C are excellent against exposure to radiation as are citrus fruits like lemons, oranges and apples. Eating lots of orange and dark green foods (sweet potatoes, winter squash, beets, carrots, chard and spinach, for example) can help protect you from radiation-induced cancers. All cabbage family plants - including arugula, turnips, radishes, cauliflower, mustard greens, bok choy, Brussels sprouts, broccoli, kale, collards, protect your cells from the damaging effects of radiation. It is said that the herb Rosemary will also protect.

Here are links with more information about radiation precautions:

<http://www.naturalnews.com/026079.html#ixzz1GQnnUzRj>

One Further Point

Now and in the foreseeable future, it is important for people to check where the food they are eating has been grown or comes from. This is because the radiation in the atmosphere was first carried by air currents to Eastern Russia and then on to the West Coast of Canada and America and afterwards to the Northern Hemisphere of Europe. Radiation will be higher in the earlier places where it first fell. We already hear that they have stopped testing milk for radiation in California, and can therefore assume that they suspect that radiation is higher than it should be. If this is true, for the time being, people would be advised to stop buying yoghurt or milk from this area of the USA.

For those who eat fish and sea products, life from the sea will need to be carefully checked to find out where it originated because the currents in the oceans will have followed the air currents. Meaning the dispersal of radiation off the west coast of America and Canada will again be greater.

Here are links on global prevailing jet streams for both the North and South hemispheres.

The path of radioactive fallout/radiation from the Japanese nuclear plants coincides with the prevailing jet streams around the world. Hence meteorologists base their forecast of radiation/fallout on these jet streams.

<http://www.woeurope.eu/weather/news/fukushima?LANG=eu&CONT=glob&VAR=jet3&HH=0>
regular global jet stream patterns

These forecasts have been quite accurate, with actual radiation being slightly lower or higher than other forecasts. A graph comparing actual radiation readings with forecasts at specific locations can be found at this link:

»Where to Go During an Earthquake«

PLEASE SHARE THIS INFORMATION WITH EVERYONE

Remember the warnings about hiding under a table or standing in a doorway during an earthquake, hurricane or tornado? Well, forget it! This is a real eye opener. It could save your life someday.

EXTRACT FROM DOUG COPP'S ARTICLE ON 'THE TRIANGLE OF LIFE'

My name is Doug Copp. I am the Rescue Chief and Disaster Manager of the American Rescue Team International (ARTI), the world's most experienced rescue team. The information in this article will save lives in an earthquake.

I have crawled inside 875 collapsed buildings, worked with rescue teams from 60 countries, founded rescue teams in several countries, and I am a member of many rescue teams from many countries. I was the United Nations expert in Disaster Mitigation for two years, and have worked at every major disaster in the world since 1985, except for simultaneous disasters.

The first building I ever crawled inside of was a school in Mexico City during the 1985 earthquake. Every child was under its desk. Every child was crushed to the thickness of their bones. They could have survived by lying down next to their desks in the aisles. It was obscene -- unnecessary.

Simply stated, when buildings collapse, the weight of the ceilings falling upon the objects or furniture inside crushing these objects, leaving a space or void next to them - NOT under them. This space is what I call the 'triangle of life'. The larger the object, the stronger, the less it will compact. The less the object compacts the larger the void created, the greater the probability that the person who is using this void for safety will not be injured. The next time you watch collapsed buildings, on television, count the 'triangles' you see formed. They are everywhere. It is the most common shape, you will see, in a collapsed building.

SAFETY TIPS DURING AN EARTHQUAKE

1. Most everyone who simply tries to 'duck and cover' when a building begins to collapse are crushed to death. People who get under objects, like desks or cars, are crushed.
2. Cats, dogs and babies often naturally curl up in the fetal position. You should, too, in an earthquake. It is a natural safety/survival instinct. You can survive in a smaller void. Get next to an object; next to a sofa, next to a bed, next to a large bulky object that will compress slightly but leave a void next to it.
3. Wooden buildings are the safest type of construction to be in during an earthquake. Wood is flexible and moves with the force of the earthquake. If the wooden building does collapse, large survival voids are created. Also, the wooden building has less concentrated crushing weight. Brick buildings will break into individual bricks. Bricks will cause many injuries but less squashed bodies than concrete slabs.
4. If you are in bed during the night and an earthquake occurs, simply roll off the bed. A safe void will exist around the bed. Hotels can achieve a much greater survival rate in earthquakes, simply by posting a sign on the back of the door of every room telling occupants to lie down on the floor, next to the bottom of the bed during an earthquake.
5. If an earthquake happens and you cannot easily escape by getting out the door or window, then lie down and curl up in the fetal position next to a sofa, or large chair.
6. Most everyone who gets under a doorway when buildings collapse is killed. How? If you stand under a doorway and the doorjamb falls forward or backward you will be crushed by the ceiling above. If the door jam falls sideways you will be cut in half by the doorway. In either case, you will be killed!

7. Never go to the stairs. The stairs have a different 'moment of frequency' (they swing separately from the main part of the building). The stairs and remainder of the building continuously bump into each other until structural failure of the stairs takes place. The people who get on stairs before they fail are chopped up by the stair treads - horribly mutilated. Even if the building doesn't collapse, stay away from the stairs. The stairs are a likely part of the building to be damaged. If the stairs are not collapsed by the earthquake, they may collapse later when overloaded by fleeing people. The stairs should always be checked for safety, even when the rest of the building is not damaged.

8. Get near the outer walls of buildings or outside of them if possible. It is much better to be near the outside of the building rather than inside. The farther inside you are from the outside perimeter of the building the greater the probability that your escape route will be blocked.

9. People inside of their vehicles are crushed when the road above falls in an earthquake and crushes their vehicles; which is exactly what happened with the slabs between the decks of the Nimitz Freeway. The victims of the San Francisco earthquake all stayed inside of their vehicles. They were all killed. They could have easily survived by getting out and sitting or lying next to their vehicles. Everyone killed would have survived if they had been able to get out of their cars and sit or lie next to them. All the crushed cars had voids 3 feet high next to them, except for the cars that had columns fall directly across them.

10. I discovered, while crawling inside of collapsed newspaper offices and other offices with a lot of paper that paper does not compact. Large voids are found surrounding stacks of paper.

In 1996 we made a film which proved my survival methodology to be correct. The Turkish Federal Government, City of Istanbul, University of Istanbul Case Productions and ARTI cooperated to film this practical, scientific test. We collapsed a school and a home with 20 mannequins inside. Ten mannequins did 'duck and cover,' and ten mannequins I used in my 'triangle of life' survival method. After the simulated earthquake collapse we crawled through the rubble and entered the building to film and document the results. The film, in which I practiced my survival techniques under directly observable, scientific conditions, relevant to building collapse, showed there would have been 0% survival for those doing 'duck and cover'.

There would likely have been 100% survivability for people using my method of the 'triangle of life.' This film has been seen by millions of viewers on television in Turkey and the rest of Europe, and it was seen in the USA, Canada and Latin America on the TV program *Real TV*.

'We are but angels with one wing, it takes two to fly' so spread these tips and save someone's life. The entire world is experiencing natural calamities, be aware and prepared!

Extract from Doug Copp's article on 'The Triangle of Life'

If you are inside a vehicle, come out and sit or lie down next to it. If something falls on the vehicle, it will leave an empty space along the sides. See below:

Save your life with "The Triangle of Life"

A safe void (triangle) will exist around a bed, a sofa or other large furniture. Curl up into the fetal position, make yourself small.

☯ Visualizations ☯

The first and last tool we have to keep us healthy, when disease or disaster threaten us, is of course, our thoughts – which is logical when we think that before any action is a thought. To put thoughts into a particular visualisation is very powerful. People with serious diseases have healed themselves with visualization alone. So why not try to protect ourselves by imagining being covered with a protective cloak or put yourself inside a large see-through multi-color rubber ball that will keep out any toxic poisons that radiation would bring?

Think or visualize yourself inside a large protective ball or covered by a protective cloak, which is surrounded by golden light rays. Anything harmful to you will bounce off your protective ball or your protective cloak and return to its source. Nothing harmful will get through to you. Release all thoughts of fear, hand them to God. You are secure, safe and loved inside your ball or surrounded by your cloak of protection. Relax into the knowledge that you are safe and protected. Breathe deeply as you see yourself surrounded by your protection and held within the golden light.

These types of visualizations are useful whenever you or your home, car, family etc. are in potentially any situations that could require protection. When the visualizations are done on a regular basis and with concentration, they can be enormously beneficial.

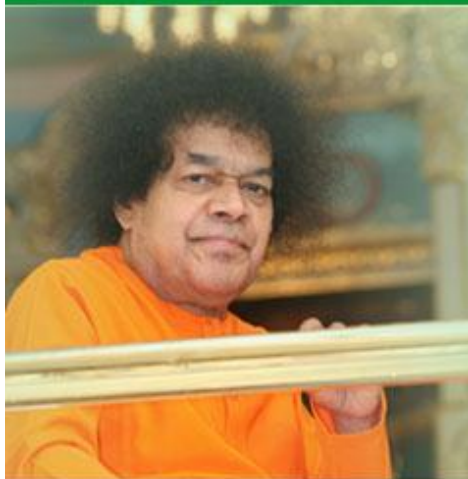

Finally the power of our Lord Sathya Sai is the most potent tool of all. With our trust and love in Him and our prayers to Him for all of us, especially all our sisters and brothers who are suffering from natural disasters or war, will be the best protection of all.

Samastha loka sukhino bhavantu. May all the beings in all the worlds be happy

Prasanthi
TODAY

Wednesday, March 30, 2011

To feel agitated and anxious when this body is suffering is the duty of Bhaktas; to take upon Myself the suffering of My devotees is My duty! I do mine and you do yours. Yours is as much your duty as My assumption of the illness is Mine. If you really understand the Reality, you have no reason to suffer, nor have I any suffering. These are only temporary, transitory suffering and anxieties that are both the expressions of Prema (Love). When the relationship between us is fixed in the recognition of Truth and the Atmic Principle, there can be no suffering, no anxiety, no agitation.
