

KIDNEY : “Thank you Aunty for your treatment, time and effort and care. I came to you towards the end of April 2011, when you gave me the remedy for my combined illnesses. I needed your help from pain caused by two trapped nerves left after surgery to reconstruct my right kidney after removing a tumour and repairing a related problem. After taking the little pills prescribed by you, my doctor did various blood tests to check my kidney function. The results came out normal which was shocking to hear for the first time in five years. I feel great and have a lot more energy and a positive outlook. I cannot thank you enough for time and support.” Dharma D, India
