

Knee Injury Cured

I began taking the "Pearls" about 18 months ago. The Vibrionics practitioner referred to these healing gems as Pearls. As I began to take them, I shortly began to feel the healing effects. I totally agreed with her. I was diagnosed with a torn Meniscus in my left knee almost 3 years ago. I did knee exercises and massaged my knee frequently, but the pain persisted. A year later, I heard about the practitioner through my sister, who had sent me an email about her work and Sai Vibrionics. We are both Baba devotees, and after reading the website, I felt that it was a God-send. I emailed the practitioner with a list of my 'maladies'. She emailed me back with a time and date to talk. The following week, we met over the phone and talked for an hour! We had so much to talk about, and most of the talk, of course was about our Beloved Baba and His love for humanity and our children.

I started taking the Pearls about two weeks later. Within two months, I felt a great difference. I was able to walk with less pain. I had a tingling pain in that area, that even when I just put my hand over my knee, without touching, there was pain! Slowly but surely, the pain began to dissipate. One day, from the advice of a dear friend who is a Yoga teacher, he told me to start doing squats. Squats! I was terrified to do squats. To me, that is a lot of deep, deep bending. He told me to take my time, and the minute it became uncomfortable, stop. So I began, twice a day, maybe hold for 1 - 2 seconds. Yes, seconds!

Today I can do squats and hold for 30 seconds or more. I know that this is the Pearls at work. The Pearls have brought 100% healing to my knee. I can walk, squat and exercise with no pain. I am forever grateful to the practitioner, the "Pearl Lady" for her tireless work with Sai Vibrionics, and her wonderful and insightful intuition. I am forever grateful to our Beloved Sai Baba for giving this gift of healing to the practitioner and the many Sai Vibrionic healers all over the world. Jai Sri Sathya Sai Baba!

Sincerely, B.F.
