

Over-dose of Calcium Injections Led to Mother's Collapse. Sai Himself Helped.

"Jai Sathya Sai, I wish to thank all in this field of "healing from the heart ". My mother is on the way to recovery thanks to Guru's Grace. She collapsed overnight due to an OD (overdose) of calcium injections. Her legs stopped functioning. She developed a large red shiny tennis ball sized lump behind her left knee. She also developed fever and remained feverish for 4 days, simultaneously she began vomiting. For three weeks we could not get her to keep down food or water. Already frail for years, she was now not even in a position to talk, her brain stopped functioning (normally). We were then told about Vibrionics.

I live in New Zealand and Sai's bhakta gave us the phone number of a Vibrionics practitioner in Mumbai. My sister contacted him and he helped out. Mum was in such a state that we felt she could not last long, but Sai takes care of his children. Sai began to stand at Mum's bedside near her feet and He smiled at her, raised His hand blessed her and told her she would be fine. She now tells us that she thought she was dreaming. She said He was robust in health and Krishna blue in colour. He would give her Darshan twice a day, morning and evening. She said this went on for so long that she was sure that it was not a dream, she became better. As she improved she talked to the Vibrionics practitioner, and he began to send Sai's healing energy to her.

Mum and I saw Sai once in 1993 and I had the Guru's Grace to see Him once more in Pune in 2009. The lump behind Mum's knee is now the size of a pea as compared to earlier when it was the size of a tennis ball. She has begun to take two steps. Also, earlier she could not walk because the calcium injections paralysed her legs. Now her knees are straightening up where earlier even while she was lying down they could not straighten. All I can say is Sai is very much here on earth as He is everywhere. He came on earth to help His children and all the Vibrionics practitioners are under His Grace and have His blessings to do good for all. We are so grateful that words are inadequate, our hearts pour with love for Him. Thank you all. We are all His children. My faith is ever stronger in Him and I can hold no ill feelings towards those who are doctors in title but not in profession."
